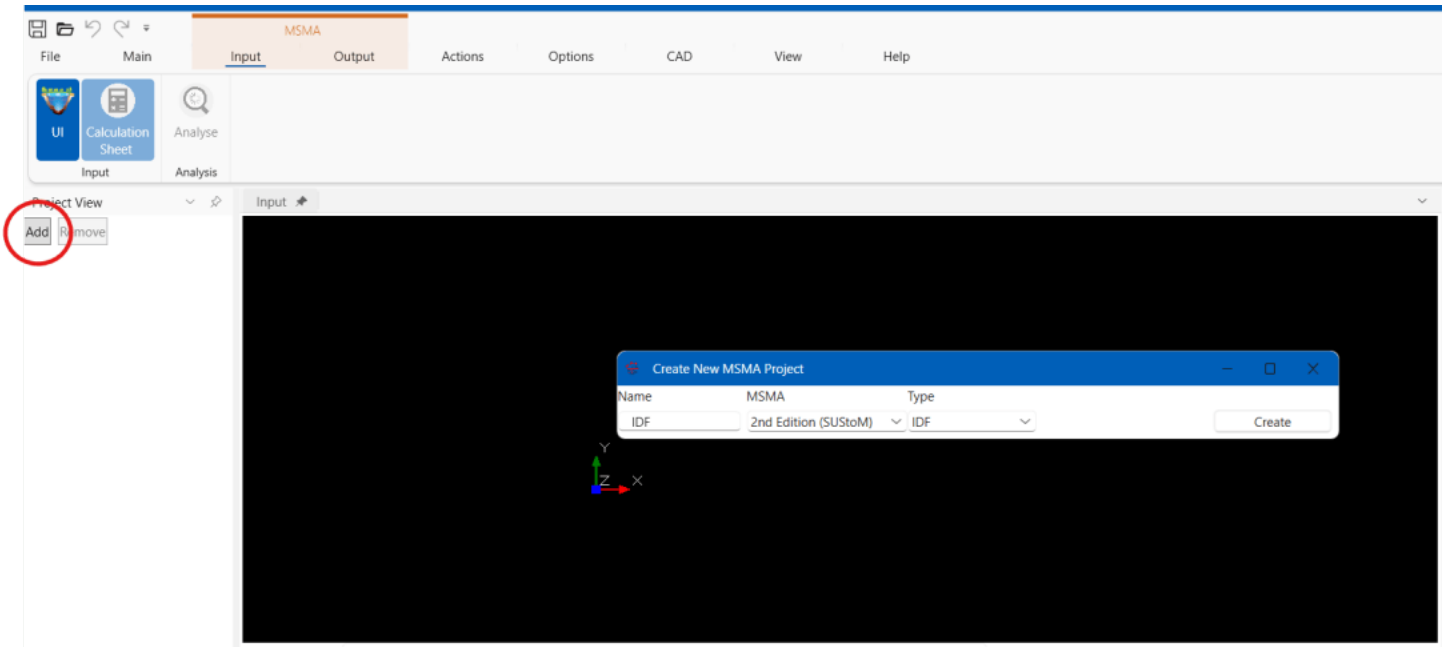
IDF

MSMA 2nd Edition · https://mes100.com/docs/idf/

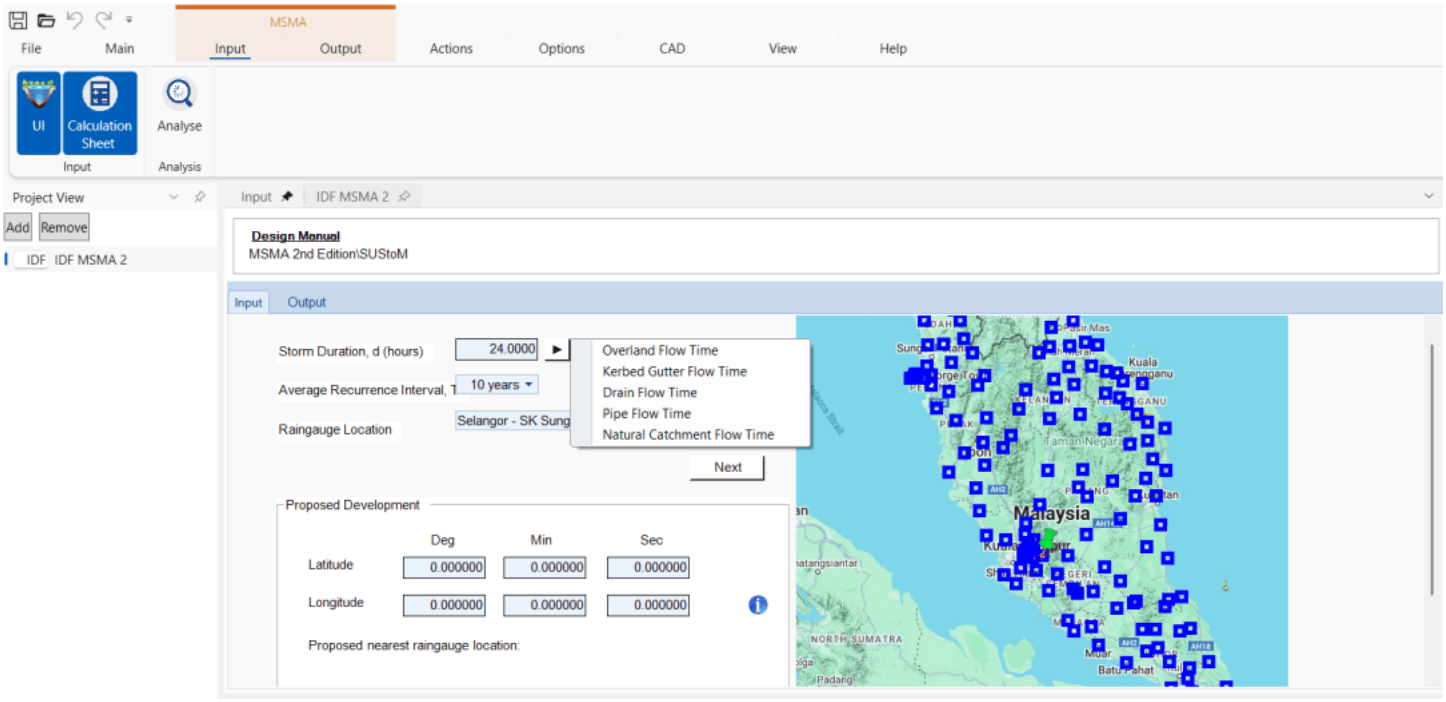
IDF

Click Add in Project View to create a new MSMA project. Choose IDF under the dropdown list button, select MSMA 2nd Edition, create the name of the project and click Create.

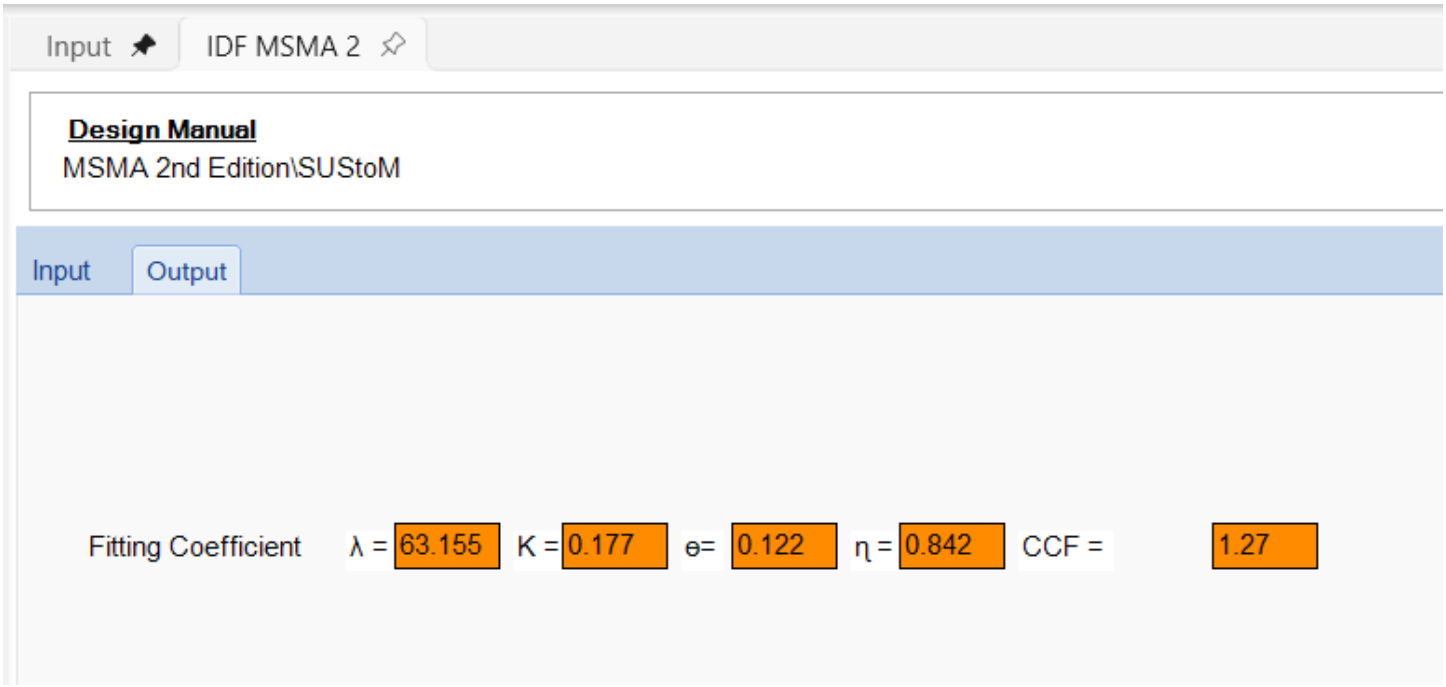


Click the project that has been created in Project View. Users have to input the Storm Duration which can be input manually or calculated by using the calculator. The equation used for each category is different.

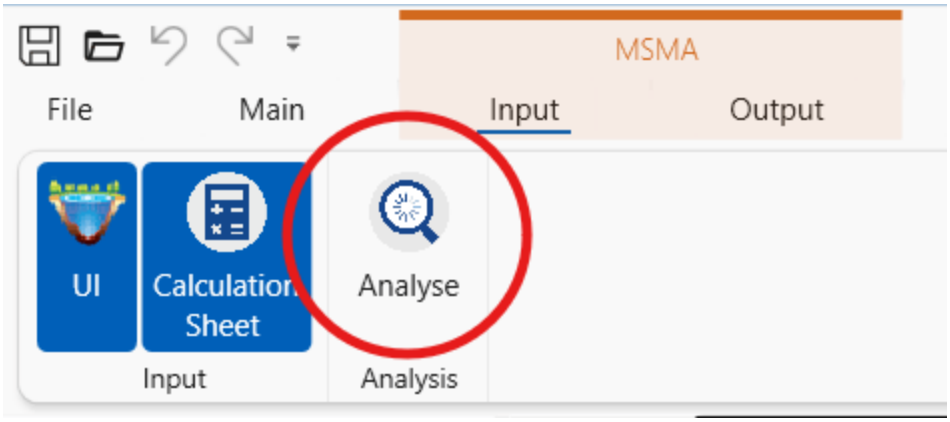
Select Average Recurrence Interval and raingauge location.



The Output shows the factors and coefficients that are used in calculating the rainfall intensity.



Click the Analyse button to generate the result.



Click the IDF Curve tab and Report tab to show IDF graph and detail calculation respectively.
